Summary

2 years of industrial experience as Software Engineer in Web Application development, commonly known as Frontend development.

Able to collaborate effectively with cross-functional teams to deliver high-quality and visually appealing user interfaces. Demonstrated expertise in responsive design, performance optimization, and browser compatibility. Proven ability to translate design concepts into functional code while ensuring scalability and maintainability.

Detail-oriented and committed to delivering pixel-perfect solutions that enhance user experience. Continuously staying updated with the latest industry trends and technologies.

My key skills include: Web Development, Responsive Web Application, JavaScript, Typescript, React.js, Python programming, C Programming, Data Structures, Algorithms, DBMS, MySQL.

I am ready to leverage my skills and knowledge to contribute to the success of your development team.

Experience (2 Years)

Associate Software Engineer

Seanergy Digital

Jan 2023 - Nov 2023 (11 months)

During my professional journey, I've had the opportunity to combine my skills as a front-end developer with the power of React.js, redux and typescript. I've honed my expertise in crafting responsive web applications, ensuring a seamless user experience.

Software Engineer Intern

Seanergy Digital

May 2022 - Dec 2022 (8 months)

I have got training and built a few hands-on projects in the domain of Full Stack and frontend. I have also received training in all the trending technologies used for web development like JavaScript and its libraries, especially React.js along with Python's Django web framework.

Product Developer Intern

National Informatics Centre, Govt of India

May 2021 - Jun 2021 (2 months)

Developed Healthcare Monitoring Smart Device (To monitor Heartbeat, Temperature,) using Internet of Things (IoT) Technology with the help of NIC coordinators and my team members.

Product Developer

J HUB

Jun 2020 - Jul 2020 (2 months)

Participated in Six Week Product Engineering Workshop organised by J-HUB, JNTUH as a team. Our proposed Idea was "Food Dart" which was to provide the Regional Food to the Migrants at reasonable prices. As a product we tried to build an Application and Website also we reached to few customers.

Education

Jawaharlal Nehru Technological University Hyderabad

Bachelor of Technology - BTech, Computer science and Engineering

Aug 2017 - Jul 2021

Licenses & Certifications

Problem Solving – HackerRank – hackerrank.com/certificates/b2b67698239a

React – HackerRank – hackerrank.com/certificates/2a9b3b6939c8

Python – HackerRank – hackerrank.com/certificates/085188d3984c
